Who We Are?

TITEC is a one stop shop for all IT related work. We offer a wide range of skills in the areas of application development, maintenance, re-engineering, quality assurance testing, mobile, cloud data architecture and much more.

Our company prides itself on recommending the most up-to-date techniques and technologies. For a rising company, or a well developed one, this allows their technology up with emerging technologies for first mover advantage.

About Us

TITEC was created in 1999 with people who had dreams to establish a technology company to help solve the issues of demand and supply within the information technology sector. Since inception, we have been able to help reduce this gap and meet with market demand around the globe.

Our mission is to provide top talent resources to meet our clients' technology investment demands using our best-in-class industry solutions, domain expertise and global influence. We also deliver result oriented solutions to meet the exact need of our clients.

24 years of ingenuity and pride in the work we do has been the #1 factor to meet the needs of our clients.
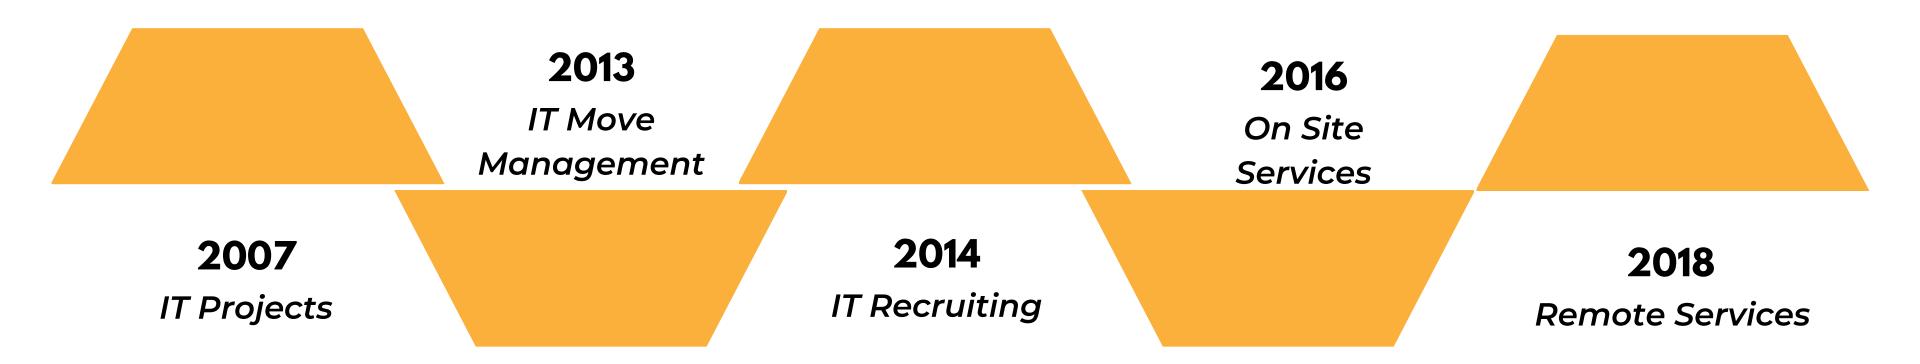

Why Work With Us?

We offer clients the best resources, the best methodologies and the best tech. A simple model that has allowed us to strive and update the market where others are currently struggling. We make it a reality to see your projects come to life and fulfill your business needs.

Our company prides itself on recommending the most up-to-date techniques and technologies. For a rising company, or a well developed one, this allows their technology team to have a first mover advantage.
